

There is one Option that must be setup before you can implement Performance Manager. This will need to be enabled by an Epicor Representative if it is not already.

Options ID# 1025: ‘Compass Business Advisor on system’ must be set to Yes.

Performance Manager is controlled by two Security Bits.

- Bit 992 allows access to Compass Business Advisor.
- Bit 977 allows access to Management Level Data.

Number	Sub System	Capability	Authorized
977	COMPASS	Allow access to Compass Business Advisor	Yes
992	COMPASS	Allow access to management level data in Compass Business Advisor	Yes
