Creating Item Lists in the Item List Viewer

Use the following procedure to create an [itemlist](#) from the Item List Maintenance Viewer. This procedure is for all types of Item Lists, including [Dynamic Promotions](#) Item Lists.

1. [Open the Item List Maintenance Viewer.](#)
2. Click Add List. The Add New Item Part List dialog box displays.

3. In the List Name field, type a name for this list.
4. In the [List Type](#) field, select the type of list you want to create (if you are creating a dynamic promotion, select B–Dynamic Promotions).

5. In the Clear Grid field, if you need to clear the grid of existing items before continuing, select Y. Select N if you want to add items to the existing list.

Code	Description
Y	Clear the grid before importing
N	Do not clear; add imported items to grid

6. In the Add Items field, select the method you want to use to add items to the list.

Code	Description
Add	Add items one-by-one
Import	Import a text file of items
Viewer	Display the Inventory Viewer to select items
No	Do nothing

Click one of the following for more information about that selection:

- [Select Add to manually enter items one at a time](#) . This option is best for small lists, when you know the SKU numbers of the items.
- [Select Import to import a text file of items](#).
- [Select Viewer to display the Inventory Viewer to select items](#).
- Select No if you do not need to add items.

7. Click OK to continue.
