Downloading TVR Promotions

Use [EPM](#) to download True Value Rewards (TVR) promotion records. True Value places TVR promotions on their servers quarterly. Thus, as you receive your regular promotion updates via EPM, TVR promotions are downloaded as well. TVR promotion records are easy to identify; the name ("promo type") assigned to them is always "TVR" followed by the two-digit month of the promotion. For example, TVR promotion records for February are named TVR02.

You probably already have EPM running weekly in an end-of-day queue, which will automatically download TVR promotions (along with regular True Value promotions). If EPM is not already in a queue, see the topics on [End of Day Queues](#) in online help for more information about adding EPM to a queue.

Downloading TVR Promotions

1. Download Electronic Promotion Pricing (EPM) as you normally would.
2. Use ASYMSG to verify the transmission was successful. For more information about ASYMSG, click [here](#).
3. Run the REPM report to process the promotion. For more information about EPM/REPM, click [here](#).
