

You will need to review the following Option ID number and make any needed adjustments prior to using Eagle Item Lists.

Options ID #9585: 'Inventory Item Lists Enabled' is not password protected. Set this flag to Yes and save your changes before using the Item Lists feature.

Enter Inventory Item Lists

Inventory Item Lists Y Yes N No

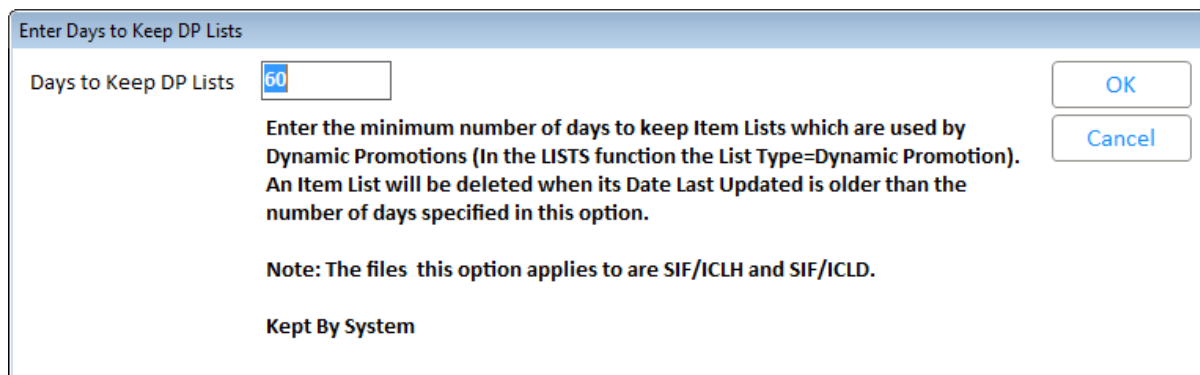

OK
Cancel

Set to Yes to allow running ROP and RSO using an Item List.
Also, if this Option is Yes and Option 1100 "Eagle Mobile on System" =Yes, RPI will allow running by Item List, and WinPIP will allow displaying the counts for an Item List.

When set to No, the field Item List will not be available in ROP, RSO, RPI, and WinPIP.

Kept By System

Options ID #9850: 'Days to Keep Dynamic Promotion Item Lists' give you the ability to determine when Item Lists are deleted by the monthly archive purge. The item list will be deleted once its 'Updated' date is older than the number of days entered in this option and the Dynamic Promotions which use it are no longer Active.

Enter Days to Keep DP Lists

Days to Keep DP Lists

OK
Cancel

Enter the minimum number of days to keep Item Lists which are used by Dynamic Promotions (In the LISTS function the List Type=Dynamic Promotion). An Item List will be deleted when its Date Last Updated is older than the number of days specified in this option.

Note: The files this option applies to are SIF/ICLH and SIF/ICLD.

Kept By System

Review the following security bits before utilizing Eagle Item Lists.

- 954
- 960
- 962
