

Eagle Mobile+ Options and Security

Eagle Mobile+ honors many of the same options you have configured as defaults for Eagle Mobile Inventory on the RF. To review these, select Mobile as the Subsystem and All Options on the Options Configuration screen.

Remember that the choices you make here can be modified for a specific session using the gear/settings section of each application.

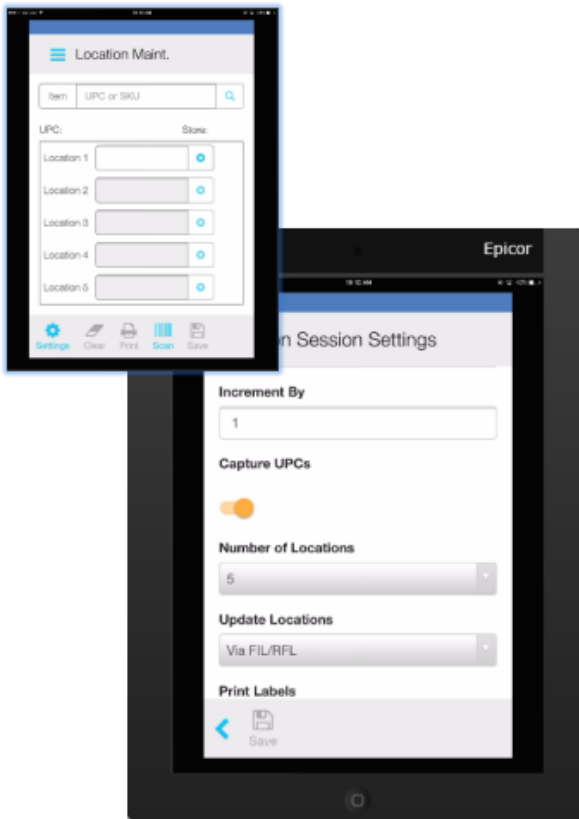

Eagle Mobile+ looks specifically at these options:

ID	SubSystem	Description	Current Value	Edit?
1100	MOBILE	Eagle Mobile Inventory on System	Yes	Pwd
1026	INVENTORY	Inventory On System	3=Full (standard purchasing) - Inventory II Plus	Pwd

Location Maintenance has a gear icon to manage settings. These are set by default from Eagle Options but you may choose to override them when managing by exception.

For example, if your default setting for Update Locations is set to Via FIL/RFL, then you will notice only the first location field is editable. Changing this setting to Direct to IMU will allow the user to change the value of all visible locations.

Assigning security bits to employees who will be using Eagle Mobile is another important step in setting up Eagle Mobile access, since they determine what capabilities each employee has.

For instance, employees who have security bit 868 can access Inventory Maintenance, but won't be able to update items unless they have 869 assigned as well. Security bits 870 and 871 allow employees to change cost and retail price respectively.

As you can see, it's important to carefully consider what type of access each employee needs in order to complete job-related tasks without putting your business data at risk. Therefore make sure your review these security bits:

Number	Sub System	Program	Capability
862	INVENTORY	RF	Mobile Inventory: Access/Update Mobile Location Assistant
863	INVENTORY	RF	Mobile Inventory: Access/Update Mobile Physical Inventory
864	INVENTORY	RF	Mobile Inventory: Access Mobile Print Label
868	INVENTORY	RF	Mobile Inventory: Access Mobile Inventory
869	INVENTORY	RF	Mobile Inventory: Update Mobile Inventory
870	INVENTORY	RF	Mobile Inventory: Allow Mobile Inventory Display/Change Cost
871	INVENTORY	RF	Mobile Inventory: Allow Mobile Inventory Change Retail Price
887	INVENTORY	PIP	Change/Delete physical inventory counts for other users
908	POS	RF	Mobile Inventory: Access/Update Shipment Verification
925	SECURITY	RF	Mobile Inventory: Access/Update session options
930	INVENTORY	RF	Mobile Inventory: Access Inventory Price Check Screen
