

Product Groups Overview – General Ledger

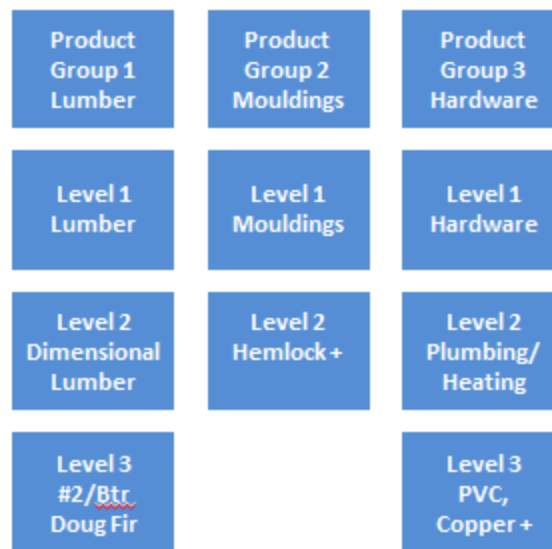

When creating Product Groups, you can set the proper General Ledger codes for Sales, Cost, and/or Inventory at the appropriate level for tracking to the General Ledger.

It is not necessary to set GL Codes at all levels, only the level identified for General Ledger tracking.

IMPORTANT!

When tracking product groups to the General Ledger at anything other than Level 1, you must have similar group levels under all other Level 1 groups.

For example, this illustration shows three product groups with several product levels each.

If you track sales to the General Ledger based on product group level 2, then:

- All level 1 product groups **MUST** have at least one level 2 group
- You **MUST** assign all products to group level 2 or lower
