Eagle Software Download Prerequisite Check Instructions
Release 30.1

EPICOR

Eagle Software Download Prerequisite

Disclaimer

30.1

Revision: June 2021

Total pages: 5

Prerequisites

✓ EOS3 (Eagle Operating System 3)

✓ Windows 7 Professional or Enterprise, 32bit or 64bit or higher
Windows XP, Windows Vista, Windows Server 2003 and 2008 are not supported.

✓ Eagle is on Release 26.0
This includes client PCO 26.0856.046, 26.0856.110 and server 38.0937.029. Other client versions are suitable as long as they are compatible with 38.0937.029 server version. The About Eagle box in eBrowser contains this software version information.

✓ Net Vista Bed Check -- This is the automatic process to deliver patches and software update notices from the Epicor cloud. Although, you should probably already be set up for this, the initial ECD process checks to be sure. If for some reason it is not set up, Epicor will work with you to get this set up and working.
   o **Note:** If you are using dialup, ECD is not supported.

✓ eConnect 3 or eConnect 4 is installed on each PC.
✓ ECD Overview Training for Eagle Software Download is complete.

✓ All client PC's must be turned on and connected to the network.

✓ Security bit 91 "Access to Osprey" – this bit is necessary to use function ECD which is run from OSPREY.

How to verify EOS3

1. Open Secure Access or Network Access
2. Type PCO
3. EOS3 – OS: 22.XXXX

a.

4. EOS2 – 21.XXXX

a.

How to verify Release 26.0

1. Launch Eagle Browser and click File > About Eagle Browser
