

What's New in Epicor Learning Center?

If you've been with us for any length of time you might notice that things are a bit different around here. The natural question is: "What changed?" and the answer is "An awful lot!"

All these changes mean less work for you, not more. Our latest release brings you a new experience from the look of the pages down into some core functionality.

Let's start with the new look. Epicor Learning Center has gone Kinetic! What does that mean? It's the new look and feel that you will start to see across lots of our applications, offering you a more comfortable and familiar experience as you move from program to program.

We've done a lot to pretty things up, but beyond our new good looks, our front page has been redesigned to make it easier to find the most visited places.

Sure, we've got the menu over here to get around, but we've also made the most important things really pop, no digging needed. The big colored boxes at the top take you to course searches, agendas, the catalog, and your live training registrations.

Featured content is bigger (because we really want you to notice it), and here are all your assignments, front and center. You can log in and start learning with just a few clicks.

As you move through screens, you'll also notice selection boxes that are easier to use, and workflows that walk you through processes more intuitively.

And then there's the upgrade I know you're going to love. It might not look a whole lot different but searching is better and faster than it's ever been. Yeah, you're welcome.

I'm showing all of this on a computer screen, and obviously you can use the Epicor Learning Center that way. BUT, you don't have to. All of our screens are responsive, meaning they stay pretty on your tablet or phone. Yes, that means they support screen rotation too.

All that cosmetic work is great, but we've also done a lot of work to help new people get up and running on the Epicor Learning Center with minimal effort. Whether you're onboarding a new person and need to set them up for training, or you're going through an implementation and need to ramp up your whole workforce, we've got you covered.

You remember how we switched to role-based training a little bit ago? That helps get the right content in front of the right people so everyone can make the best use of their training time. We took that idea and ran with it. Now, we have agendas built for roles that automatically get assigned to new people as soon as you create them in the system. So now assigning training is as simple as creating the user, assigning that user a role, and BAM! You're done! Epicor Learning Center handles all the initial assignments for you.

That doesn't mean you're limited to the training program we've created though. Just like before, you're free to make any changes you want: content, due dates, every aspect is under your control. You can modify what we made, or create your own from scratch, but this initial education burst is a turn-key solution if you want it to be. That's a load off your shoulders, isn't it?

So what are you waiting for? Dive in and take advantage of everything the Epicor Learning Center has to offer!
