

Serialized Products Setup

In BisTrack 6.0 and higher, you can configure serial numbers to track serialized products from receipt through sale. When you receive products with the Serialized Sub type, you assign a pack reference or serial number. That reference number remains associated with that item throughout its life.

When picking for an order you'll select which serial numbers to deliver. This feature gives you full visibility into the lifecycle of a serialized product, and easy lookup for any questions, issues, recalls or returns.

Serialized Products Setup

To create a serialized product, set the Product type to Sheet Material and the Sub type to Serialized. Read More...

These products require you to enter reference numbers when receiving them on a Stock Receipt.

In BisTrack 6.0 and higher, you can use the serialized subtype to enable the use of Serial Numbers on products. In Product Setup, set the Product type to Sheet Material, and the Sub type to Serialized.

When you assign that subtype BisTrack updates the Stock Options tap. Finish completing the New Product as usual.

With the Serialized Sub type set, you can assign serial numbers when you receive this product on a Stock Receipt.
