

Warehouse Management with Mobile Devices Counting Transcript

Using BisTrack Count on your mobile device makes counting your inventory a breeze!

Once you've logged in, if there are multiple branches available, select the branch you want to work in, and press OK.

Download the new count by selecting Import. The app gives you different download options to select products based on the criteria used to create the download. If you plan to work on the count later while off-line, download the product data ahead of time.

Choose the Count to Import and then select OK. The import options available vary based on the criteria used to build the Count. Select which lines to import for the count using the dropdown and selection menu. Select OK.

Choose Count. On the Available Counts screen, select OK.

Enter or scan the product information. You can use the Ellipsis menu to change the search options in the app.

With the product information displayed, enter the count quantity and press OK. Repeat the process for the rest of the items in the count.

When you're counting Tally products, the app provides an entry method that you can use to calculate the total count. Enter the Count and then select Tally.

Now enter the Tally String and select OK. Select OK to complete the entry.

When you finish the count, use the Summary view to reexamine and edit it. This may include entering or deleting count information, viewing variances, and product-to-be counts. Choose a Count from the list and select OK. Use the Ellipsis menu to toggle Show/Hide Variance information.

When you're finished reviewing the count information, select OK. Then select OK on the confirmation screen.

Use the Export function to send the Count information to BisTrack. Choose Yes to confirm the Export. Then select OK.

The app displays a confirmation that the Export was successful. Choose an option to retain or remove the count from the device and proceed to the next count.
