How to Configure TelnetCE

You can install the Plug-in on only the Motorola 9090, the Symbol 3090, and the Data Falcon MC4423. If the gun has been sent in for repair the plug-in will already be installed on the gun.

To check if the gun has the Plug-in.

- Log off all applications and get on the desktop on the gun.

- Click start and TelnetCE. If you do not see TelnetCE check under programs for the applications.

- Once TelnetCE has started, you will see OPTIONS in the lower right corner. Click Options.

- Next you will check Configure.

- Next you will check on Host Profile

- Host Profile will prompt you for a password which is System.

- Next you will need to edit each of the profiles you will be using. Highlight the profile and click Edit.

- This is where you edit the address of the Eagle server (If needed) and you will see a check box for the SSH plug-in. Check the box and save the configuration.

- This will change the gun to using port 22 instead of port 23. When you first log in you will get a certificate error, accept it and continue.

About Epicor

Epicor Software Corporation drives business growth. We provide flexible, industry-specific software that is designed around the needs of our manufacturing, distribution, retail, and service industry customers. More than 40 years of experience with our customers' unique business processes and operational requirements is built into every solution— in the cloud, hosted, or on premises. With a deep understanding of your industry, Epicor solutions spur growth while managing complexity. The result is powerful solutions that free your resources so you can grow your business. For more information, connect with Epicor or visit www.epicor.com.
